BEER, WINE, AND SPIRITS

SOUTH AUSTRALIA

1961-62

SCOPE

This bulletin gives details for South Australia of the commercial production and distribution of wine and spirits, stocks of wine and spirits held by manufacturers and wholesalers, and the consumption of beer and spirits. Details of beer production in South Australia are not available for publication, and wine consumption figures are calculated only for Australia as a whole.

PRODUCTION
OF WINE
AND SPIRITS

The quantity of wine made in South Australia in 1961-62 was 30,830,800 gallons, about 23 per cent more than in 1960-61 (25,060,800 gallons), and by far the greatest annual production ever recorded; the previous record was 26,399,000 gallons in 1957-58. The quantity of fortifying spirits distilled was also a record; production of 2,948,600 proof gallons considerably exceeded the previous record of 2,620,900 proof gallons in 1952-53 and was nearly 38 per cent more than the 2,138,300 proof gallons distilled in 1960-61. Brandy production of 1,042,600 proof gallons was slightly less than in 1960-61 (1,044,300 proof gallons) and well below the record of 1,125,900 proof gallons in 1957-58.

Wineries and distilleries processed a total of 172,009 tons of fresh grapes compared with 137,694 tons in 1960-61 and 141,559 tons in 1957-58.

WHOLESALE
SALES TO
RETAILERS

Wholesale sales of wine to retailers decreased from 2,262,900 gallons in 1960-61 to 2,204,900 gallons in 1961-62 and were less than for any year since 1956-57. Sales of flor sherry almost doubled to 48,000 gallons, but this was more than offset by decreased sales of other dry and sweet sherry. Sales of dessert wines (both sweet white and sweet red) and dry red table wines also decreased. Higher sales were recorded for dry white and sweet table wines.

Brandy sales decreased from 136,600 proof gallons in 1960-61, to 126,700 proof gallons in 1961-62.

The figures above include sales to interstate retailers and therefore cannot be taken as an indication of actual consumption in South Australia.

EXPORTS

Less wine was exported from South Australia in 1961-62 (7,963,000 gallons) than in 1960-61 (8,432,400 gallons); direct overseas exports decreased from 1,813,300 gallons to 1,567,700 gallons and interstate exports from 6,619,100 gallons to 6,395,000 gallons. Direct overseas exports of brandy increased from 77,800 proof gallons in 1960-61 to 95,700 proof gallons in 1961-62.

STOCKS

Wine stocks held by winemakers and wholesalers totalled 30,229,200 gallons at 30th June 1962. This was considerably more than in 1960 (27,727,900 gallons) and 1961 (27,225,600 gallons) but much the same as in 1958 and 1959 and only a little below the record of 30,398,000 gallons held at 30th June 1954. Stocks of fortifying spirit increased from 999,400 proof gallons at 30th June 1961 to 1,727,300 proof gallons at 30th June 1962, the highest level ever, the previous highest being 1,401,500 proof gallons in 1954. Brandy stocks were also a record, increasing from the previous record of 3,624,600 proof gallons at 30th June 1961 to 3,754,400 proof gallons at 30th June 1962.

25. 1/10/19

CONSUMPTION

Estimated consumption of beer per head of population in South Australia increased slightly from 17.66 gallons in 1960-61 to 17.71 gallons in 1961-62, the first increase for several years; estimated total consumption was 17,355,000 gallons compared with 16,905,000 gallons in 1960-61. Estimated spirits consumption per head of population was also a little higher, increasing to 0.34 proof gallons from 0.29 proof gallons in 1960-61. There are no wine consumption figures available for South Australia, but the estimated Australian consumption per head of population decreased from 1.16 gallons in 1959-60 to 1.12 gallons in 1960-61, the latest year for which a figure is available.

RETAIL
SALES

The value of retail sales of beer, wine, and spirits, amounted to £23.1 million for the year ended 30th June 1962, an increase of £1.2 million over sales for the previous year.

1. The first part of the report deals with the general situation of the country and the progress of the work during the year. It is divided into two main sections: the first section deals with the general situation and the second section deals with the progress of the work.

2. The second part of the report deals with the specific work done during the year. It is divided into three main sections: the first section deals with the work done in the field, the second section deals with the work done in the laboratory, and the third section deals with the work done in the office.

3. The third part of the report deals with the results of the work done during the year. It is divided into three main sections: the first section deals with the results of the field work, the second section deals with the results of the laboratory work, and the third section deals with the results of the office work.

4. The fourth part of the report deals with the conclusions drawn from the work done during the year. It is divided into three main sections: the first section deals with the conclusions drawn from the field work, the second section deals with the conclusions drawn from the laboratory work, and the third section deals with the conclusions drawn from the office work.

5. The fifth part of the report deals with the recommendations made for the future work. It is divided into three main sections: the first section deals with the recommendations made for the field work, the second section deals with the recommendations made for the laboratory work, and the third section deals with the recommendations made for the office work.

TABLE 3 - WINE AND BRANDY (a) : WHOLESALE SALES TO RETAILERS, SOUTH AUSTRALIA

This table shows sales of wine and brandy to retailers, both local and interstate, made from stocks held in wineries, depots, bulk stores, etc., operated in South Australia, but excludes oversea exports, ships' stores, and sales to agents and wholesalers. As the quantities shown include sales to interstate retailers, the table cannot be taken as an indication of actual consumption in South Australia.
